Output is "formatted" with newlines and indentation spaces.

1) The indentation is not done consistently 
2) make it an option (-p) for printing formatted output, the default should be without the formatted since the spaces add a lot of bulk to the results.

History

#1 - 01/08/2013 04:37 PM - Celso Reyes
- Status changed from New to In Progress

noticed that the formatting has changed, but the -p option works (though it is undocumented in help) as of v0.93

#2 - 01/15/2013 12:24 PM - Yazan Suleiman
- Status changed from In Progress to Feedback

I need more feedback. Please check the new format

#3 - 01/16/2013 10:12 PM - Chad Trabant
- Status changed from Feedback to In Progress

The default "compact" or unformatted output is good.

The formatted output still contains sections lacking indentation, here are some examples:

```
...  
   <Stage number="1">  
    <PolesZeros>  
     <InputUnits>  
      <Name>M/S</Name>  
      <Description>Velocity</Description>  
     </InputUnits>  
     <OutputUnits>  
      <Name>V</Name>  
      <Description>Volts</Description>  
     </OutputUnits>  
   </PolesZeros>  
</Stage>

...  
   <NormalizationFrequency>0.05</NormalizationFrequency>  
    <Zero number="0">  
     <Real>0.0</Real>  
     <Imaginary>0.0</Imaginary>  
    </Zero>  
    <Zero number="1">  
     <Real>0.0</Real>  
     <Imaginary>0.0</Imaginary>  
    </Zero>
```

what is the status of this? The format has not changed. I thought this was going to be documented and closed as a "won't fix"

- Resolution set to Won't Fix
- Status changed from In Progress to Closed
