On hold for now, the default framework for Jersey, HK2, is being used. There was no apparent, immediate advantage in switching and an additional bridging mechanism like Spring Bridge or Guice Bridge would be needed. Adding a bridge seems to add to the complexity without adding value.

#2 - 05/25/2018 08:18 AM - Mike Stults
- Resolution set to Won't Fix

No action planned, upgraded Web Service Shell to newer version of Jersey in addition to other features of 2.x.
